MONTIGO[®]
the art of fireplaces

features

- Viewing widths standard from 3ft - 24ft, custom sizes are available
- Any custom combustion air intake location
- Unlimited firebox configurations
- Optional damper for flue or intake
- Frameless firebox design
- Available for applications indoor, outdoor, or both
- Linear, logset, or custom burner pattern
- Five Montigo power vent termination options
- Enhanced or advanced safety with cool-touch glass
- Every installation reviewed by our engineering team
- CSA Certified in Montigo's accredited on-site lab

Venting

Montigo power vents are designed and manufactured in-house to ensure an optimized fireplace system is created.

Power vent fans are sized specific to each application to move the air through and eventually out of the building meaning you can locate your fireplace anywhere. With modules as large as 5 HP, vent runs can extend up to 550ft.

Multiple power venting options provide flexibility:

External

- Roof
- Wall
- Updraft (low profile)

Internal

- Inline
- Flush Wall

COOL-Pack Technology

The glass temperatures on a gas fireplace typically range $\pm 500^{\circ}\text{F}$. Even momentary contact at these extreme temperatures would result in serious burns to the skin.

Montigo's patented COOL-Pack and Power COOL-Pack glass technologies have been designed to significantly increase safety by maintaining glass temperatures as low as 125°F (52°C).

COOL-Pack technology makes it safe to touch the glass, reducing associated liability risks for the property owner.

Intake Locations

Montigo develops all units from an installation friendly perspective.

Multiple intake location options mean the fireplace will not dictate, but adapt to your design. Intake location options vary depending on configuration and size of unit.

Six options provide adaptability:

- Bottom
- Front
- Rear
- One Side
- Both Sides
- Top

Montigo Custom Engineering

With decades of manufacturing excellence, collaborative relationships with architects and designers, and an instinctive drive to lead the fireplace revolution, Montigo delivers the perfect fireplace to fit your style – if you can dream it, the Montigo engineers will strive to achieve it..

We not only meet, but exceed the testing standards required by regulatory bodies through employing multiple built-in safety controls. Every unit passes through extensive pre-shipment testing at our in-house CSA accredited laboratory and leaves our factory bearing the CSA logo.

Innovative design, handcrafted with care, unique to each installation. From private luxury homes, to hotels, casinos, restaurants, and other public spaces, a fire feature is the heart of every warm and inviting space.

See owner's manual for complete installation instructions and product warranty. All product information is accurate at time of printing and is subject to change. Printed images may vary from actual product.
