DOMESTIC

We cracked the code to **making great pizza at home**

A family business since 1977

Leading a professional team requires leaders who can lead and motivate, who have a clear vision of the future and a keen eye on traditions: **Marcello Ortuso and Rocco Lauro are the founders of Alfa Ovens** and the soul of this great, wonderful company.

"We are proud to be Italian and we are proud to work with the best Italian artisans!"

Handmade in Italy

Alfa headquarter is based in **Anagni**, between Roma and Napoli, in the birthplace of pizza.

Every Alfa Oven is 100% handmade in Italy, by skilled artisans.

The word "artisan" comes from "art". That's why today more than ever, being an artisan means **combining creativity and skill, energy and passion to create something unique** with your own hands. Our domestic and professional ovens have been recognized worldwide for their quality and design for more than 45 years.

“In a series of thermodynamic equations, the researchers determined the formula for exactly how the brick oven imparts the perfect amount of heat to the pie. In general, heat is released relatively slowly from the brick, causing the crust to crisp up without burning while the toppings cook more quickly and give off some of their moisture, leading to the perfect balance.”

The Physics of a Perfect Pizza,
by Jason Daley Smithsonian Magazine

Alfa cooks toppings at one temp, crust at another

Why is it so difficult to make great pizza at home?

Pizza is the world's, and America's, favorite food. Ahead of burgers, steak, chicken. Everything! Why, then, do people routinely make burgers, steak, and chicken at home, but not pizza?

The problem is the pizza. **The solution is Alfa.**

Burgers, steak, and chicken are easy to cook correctly. They are one-dimensional foods. Pizza is a two-dimensional food. You've got the dough, which to turn into a crispy crust on the outside that's moist and chewy on the inside, needs to be cooked quickly on a stone at a high temperature. And, you've got the toppings - cheese, sauce, meats and veggies all of which have high moisture content. In order to fully cook them in the same short time it takes to bake the crust, you need an even higher temperature.

Other at-home pizza ovens, especially inexpensive entry-level pizza ovens, are not designed to make this all happen in concert. None of them, that is, except the Alfa Heat Genius™ Pizza Oven. Alfa has a long history of building commercial pizza ovens, and they've applied this Heat Genius technology to their at-home pizza ovens. Alfa works like the commercial pizza ovens in a restaurant. It gets really hot and maintains the heat far better than other at-home pizza ovens. This means you get a crispy crust that's still moist and chewy, cheese that's melted and toppings that are perfectly cooked.

INTRODUCING

Heat Genius™

Alfa's technology trifecta!

ALFA

01. Authentic HeatKeeper™ Firebrick vs ordinary lava stone or ceramic

Alfa uses an authentic firebrick in every pizza oven they make. This HeatKeeper firebrick, which they make in their factory in Rome, Italy, the home of pizza, absorbs and stores heat far better than the lava stone or ceramic used in other pizza ovens. This is crucial to baking a crispy, moist crust at precisely the right temperature, quickly and without burning.

02. DoubleDown Ceramic Superwool® Insulation vs ordinary rock wool insulation (or no insulation at all)

The space between the two stainless steel walls on an Alfa Pizza Oven is filled with DoubleDown Superwool® insulation. This European ceramic fiber offers up to twice the heat resistance of the rock wool insulation used in other artisan at-home pizza ovens, which maintains the heat and allows you to consistently bake perfect pizzas. It also allows for faster heat recovery between pizzas and dramatically lowers the temperature of the outer oven wall.

Superwool® is a registered trademark of Morgan Advanced Materials

03. Patented Full Effect Full Circulation Flue System® vs ordinary “up and out” chimneys

Other pizza ovens exhaust precious heat out the chimney at the top of their oven. Up and out! Not Alfa. The chimney may be at the top, but, thanks to the patented Full Effect Full Circulation Flue System®, hot air circulates fully around the chamber and is driven back down to where it can heat the firebrick and pizza. This is key, as it ensures the proper temperatures required to bake both crust and toppings. The circulating heat then hits a deflector at the top of the oven and travels up an escape where it finally exits out the chimney. Around and down. Then up and out. Clever!

The art and science of Pizza baking performance

Six additional reasons to buy an Alfa Heat Genius™ Pizza Oven.

These ovens are built sturdy!

Forninox™ Premium Stainless Steel Chamber Construction

If you are going to generate high heat you need to withstand high temperatures. The Forninox combustion chamber on an Alfa Pizza Oven is constructed of two different types of special thermal-resistant heavy-gauge steel.

The inner wall is made of a titanium-impregnated 441 stainless that can tolerate thermal stress, is resistant to heat, corrosion and atmospheric agents.

The stainless used for the exterior wall is also heat and acid-resistant as it contains less iron than the steel used in other pizza ovens.

Together, these chamber walls help retain Alfa's heat while also providing for a well-made, very sturdy oven.

Testing reveals the perfect shape for the perfect pizza.

OptiDome Half-Sphere Design

The unique shape of an Alfa Heat Genius Pizza Oven is integral to its performance. The “flattened” half-dome design was developed after extensive testing revealed the shape maximized circulation and heat flow, a phenomenon that leads to quick heat-up as well as consistent temperatures for even cooking.

Seamless Shell. (unlike other pizza ovens)

Seamless Shell Construction

Alfa Pizza Ovens are built to last. The oven shell features seamless construction which will last much longer than the riveted shells on other pizza ovens.

Choosing the right size Alfa Pizza Oven

Compact (1 Pizza)

A compact oven has ample space for a good-sized pizza. A full meal would need to be cooked in sequence.

Medium (2 to 3 Pizzas)

A medium size oven has extra space allowing you to cook an additional item simultaneously cutting total cooking time in half.

Large (4 to 5 Pizzas)

A larger oven has the space to cook pizza and an entire meal all at the same time, making ideal for a family.

Our burners push heat across the oven while others blow it out.

Premium SideFire Gas Burner

All gas-powered Alfa Ovens feature a SideFire Burner system in which the burner is located on the side of the oven. This way, the heat is blown across the oven to circulate up and around the combustion chamber. Other brands place their burners in the back of the oven. This means the heat is blown out the door which is, obviously, very inefficient.

Heats up much faster than other artisan pizza oven.
(shorter time between pizzas, too)

“Ready Already” Faster To Baking Temperature

Alfa's Heat Genius™ design not only allows you to bake the perfect pizza, it also allows you to start baking the perfect pizza much sooner. There is nothing more frustrating than having to wait for the pizza oven to heat up when you have hungry pizza-lovers that are ready to eat. Alfa can be ready in as little as 20 minutes, much faster than other artisan pizza ovens! And, as important, your Alfa Pizza Oven will better-maintain the heat, as well. With other pizza ovens, after removing a baked pizza or pizzas, the vessel will take considerably longer to come back up to proper temperature which, again, causes hungry pizza-lovers to wait.

The finish is beautiful and made to last.

Double Powder-Coated Oven Shell

All Alfa Pizza Ovens are double powder-coated using a seven-step powder-coating process that will ensure a durable, long-lasting finish.

CLASSICO Line

Alfa's CLASSICO line is a clever combination of traditional lines and technological innovation. Soft but elaborate curves to embellish any space. An artisan oven perfect for elegant villas and gardens.

The unique patented design of our ovens ensures a comfortable and elegant cooking experience, whether in an outdoor kitchen or in the garden, thanks to materials and technologies that promote excellent resistance to moisture and efficient thermal insulation.

FUTURO Line

Alfa's FUTURO line is specially designed for outdoor kitchens. The design, structure and front in stainless steel make it ideal to pair with your grill or other cooking equipment.

Alfa Ovens's evolution lies in the design, innovation and versatility of its ovens. The FUTURO line allows all types of cooking and thanks to its capacity, it's ideal for the whole family to eat in little time.

MODERNO Line

The MODERNO Line was designed to enhance the beauty of the design and performance of Alfa ovens while maintaining the characteristic lines that distinguish them. Perfect for those who have many friends with whom to share the taste of Italian cuisine.

Alfa ovens are the most satisfying outdoor cooking experience. Every technical feature of Alfa's stainless ovens is designed to improve your life. Starting with the speed of ignition and cooking precision: they quickly heat up to 1000°F and can cook a pizza in 1 minute.

MODERNO Portable

THE NEW PORTABLE PIZZA OVEN BY ALFA

A true Neapolitan Pizza Oven, that marries technology and design in only 77 lbs.

The new Moderno Portable is compact and only weighs 77 lbs. Thanks to the available carry bag cover it can be transported anywhere you desire. Easy to assemble - just insert the flue and chimney cowl and let the party begin.

Colors:

Dimensions: 43.5x33x59.5h in

A comprehensive selection of premium quality accessories.

Pizzaiolo Kit

The best set of tools, for the best pizza chef.

The Alfa Pizzaiolo Kit is the best selection of pizza tools that you can find on the market. It includes many first-rate accessories that will allow you to immerse yourself in the fabulous world of the “arte bianca” (bakery and pizza making) by fully exploiting the great performances of our at-home pizza ovens.

Low & Slow Kit

We have created our new LOW & SLOW kit.

Designed to optimize the cooking of **bread, bakery products** or other dishes that require low temperature cooking like **ribs, roasts and vegetables**.

Thanks to the **glass door** you can keep on eye on what you are cooking without the need to open the door and loose heat.

Thanks to the **butterfly valve**, you can maintain low temperatures with ease.

Multi-functional base

The Alfa base is a table that allows for maximum versatility when setting up an outdoor kitchen on wheels and to get the best out of your outdoor oven.

- It comes with 4 swivel castors with brakes.
- Made of high-resistance stainless steel with no sharp edges.
- It is equipped with a large compartment to store firewood and gas cylinders to have them always at the ready.
- It includes many serviceable accessories such as a peel holder, a handle to move it around, a bottle opener and hooks to hang tools like towels or oven mitts.

BBQ 500

BBQ 500 is the kit to cook in a very special way; a kind of mix between baking, grilling and barbecuing.

Hybrid Kit

Alfa's patented Hybrid Kit turns your gas oven into a wood-fired oven.

- Allows you to burn wood in your gas-fired oven
- Compatible with 2, 3, 4 and 5 Pizzas models.
- Made of AISI 441 stainless steel; can withstand temperatures in excess of 2000°F.

Oven covers

The ALFA Oven Cover is the best protection for your outdoor oven.

They are specifically designed for every model
and made with a technical fabric that protects it from
the atmospheric corrosion and the normal wear and tear.

- Made with waterproof material for protection against bad weather.
- Suitable for wood and gas-fired ovens.

Peel holder Vela

The Peel Holder Vela, as well as being comfortable and functional, fits well to all the environments of your home, both indoor and outdoor. It is indeed a unique tool, refined and with an innovative design.

Note: the product is sold without peels.

Wood holder

The Alfa Wood Holder is a rack that allows you to light the fire faster as it lets the air pass through the logs for a better burn.
